## Math 150

Section 3.2 Truth Tables and Equivalent Statements
$\underline{\text { Truth Table for } \sim p}$

| $p$ | $\sim p$ |
| :---: | :---: |
| T | F |
| F | T |

Truth Table for $p \wedge q$

| $p$ | $q$ | $p \wedge q$ |
| :---: | :---: | :---: |
| T | T | T |
| T | F | F |
| F | T | F |
| F | F | F |

Truth Table for $p \vee q$

| $p$ | $q$ | $p \vee q$ |
| :---: | :---: | :---: |
| T | T | T |
| T | F | T |
| F | T | T |
| F | F | F |

$\underline{\text { Example } 1}$ Construct a truth table for the compound statement: $r \vee(p \wedge \sim q)$

Theorem A logical statement having $n$ components will have $2^{n}$ rows in its truth table.

Two statements are equivalent if they have the same truth value in every possible situation. (Notation: $p \equiv q$ means $p$ is equivalent to $q$.)

De Morgan's Laws

$$
\begin{aligned}
& \sim(p \wedge q) \equiv \sim p \vee \sim q \\
& \sim(p \vee q) \equiv \sim p \wedge \sim q
\end{aligned}
$$

Example 2 Show that $p \equiv \sim(\sim p)$.

Example 3 Show that $\sim(p \wedge q) \equiv \sim p \vee \sim q$.

Example 4 Show that $\sim(p \vee q) \equiv \sim p \wedge \sim q$.

Example 5 Negate "I am not going or she is going."
