

Answer Sheet

Enter a check for each answer in the column for a or b. Remember to circle the letter below the larger number of each pair (see Sample Answer Sheet above for illustration). If the two numbers of any pair are equal, then circle neither, but put a large X below them and circle it.

Directions for Scoring

1. Add down so that the total number of a answers is written in the box at the bottom of each column. Do the same for b answers. Each of the 14 boxes should have a number written in it.
2. Transfer the number in box No. 1 of the answer grid to the box No. 1 below the answer grid. Do this for box No. 2 as well. Note, however, that you have two numbers for boxes 3 through 8. Bring down the first number for each box beneath the second as indicated by the arrows. Now, add all the pairs of numbers and enter the total in the boxes below the answer grid, so each box has only one number.
3. Now you have four pairs of numbers. Circle the letter below the larger numbers of each pair. (For example, if you have a score of 8 for E and 2 for I, then you would circle E) If the two numbers of any pair are equal, then circle both.
