II) Graphic presentation.

1
"TOP DOG" The following graph is based on registration figures by the American Kennel Club.

Ex. Bar Graph. Frequency for "qualitative variable" *note space between bars

2

Ex. Histogram. Frequency for "Quantitative Data" best for discrete & not overlapping information

3

Ex. Frequency polygon. "Quantitative data"
Line graph. Two variables.

II) Describe distributions (common to our class)
1. bell-shaped/normal
2. skewed
   a) positive
   b) negative
3. bimodal
4. rectangular
