Final Project and Presentation

DIFD 151 - Spring 2013

Project Requirements:
The final project for each group is to select a website that exemplifies at least three of four DIFD disciplines and then to present the website to the class.

It’s important that you find a good website, and it’s important that you do it fairly quickly, as there may be contention for the more popular sites.

Each project group sends me an email (roudaj@winthrop.edu) by midnight of Thursday, February 28, 2013. Your email should list your selected website, DIFD disciplines your group is going to discuss and who is responsible for each discipline.

Presentation Requirements:
Presentations will be on April 18th and 25th. Each project group will have 5 minutes for the presentation and 2 minutes for questions. The presentation includes about 1 minute for Introduction, 1 minutes for each discipline, and about 1 minute for conclusion.

If a group has 3 persons, the first person presents the introduction and the first discipline, the second person presents the second discipline, and the third person presents the third discipline and the conclusion.

If a group has 2 persons, one person presents introduction, the first discipline and conclusion, and the other presents two other disciplines.

If a group has 4 persons, one person presents introduction and conclusion, and each of other three persons presents one discipline.

The introduction should include a clear statement of which DIFD disciplines you are going to discuss in the presentation.

According to your understanding of four DIFD disciplines, evaluate the website’s contents, usability and implementation technologies, and your presentation should discuss how these aspects match or use which techniques in which disciplines.

The conclusion gives a summary on your evaluation on the website, and should also specify some critiques you have heard or found.

Project and Presentation Rubric:
• Overall organization of your project: 25 points. Same grade for each partner.
• Is the web site a good choice for the disciplines covered? 10 * 3 = 30 points. Same grade for each partner.
• Presentation content for each presenter: 25 points. Individual grade.
• Presentation quality for each presenter (e.g. well prepared, good eye contact, flows smoothly, stays within time limit): 20 points. This is an individual grade.

Go ahead and get started.
